

Same Day Surgery at Hunterdon Center for Surgery

Hunterdon Center for Surgery is a same-day surgery center located in Flemington in the Wescott Medical Arts Building at 9100 Wescott Drive on the 2nd floor. It is a modern facility offering state-of-the-art surgical equipment which allows us to perform your operation expertly and efficiently. Here are some things you need to know about your experience there:

1. Please do not bring any valuables with you.
2. Please do not bring extra clothes—a gown and slippers will be provided.
3. Although you should not eat or drink anything after midnight before your surgery, we encourage you to drink as many fluids as possible before midnight.
4. After arriving at ***Hunterdon Center for Surgery*** on your day of surgery:
 - a. A nurse will introduce you to the pre-op area and take a brief history of your problem.
 - b. An anesthesiologist will talk with you and answer your questions about the anesthesia.
 - c. A prep will be done of the surgical area to cleanse and shave the skin.
 - d. Your surgeon will greet you and answer any last minute questions.
5. Someone will need to drive you home after the surgery. That person can stay and wait or can come back for you later. If someone is waiting, then the surgeon will let that person know when the procedure is finished.
6. After surgery, you will go to a recovery area for a period of time that varies between 15 minutes and one hour, or longer, until you have recovered from the anesthesia.
7. You will then be moved back to a reclining chair in the pre-op area until you feel comfortable enough to go home. We want to be sure you can drink fluids and urinate before you leave.
8. Your surgeon will try to discuss the results of the operation with you after you recover from anesthesia, but if he misses you, he will call you at home later in the day.
