Patient Consent Form

I, _____, (parent / guardian or minor) understand and agree with the following:

According to a study published in the December 2010 online edition of Spine, a leading international peer-reviewed journal, the Scoliscore Test has a 99 percent accuracy rate in predicting which children are least likely to progress to a severe curve (Cobb angle of 40 degrees or more) that may require surgery.

Signature of Parent of Guardian

Date
